

Subham Das

(908)-421-4352 | das.ricky999@gmail.com | linkedin.com/in/ricky-das

EDUCATION

University of Wisconsin–Madison, Senior

Madison, WI

Major: *B.S. in Computer Sciences*

Sep 2022 – May 2026

Minors: Business, Entrepreneurship

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Machine Organization, Computer Engineering, Discrete Mathematics, Linear Algebra, Applied Stats for Engineers, Programming I/II, Building User Interfaces, Mobile Systems

EXPERIENCE

Amazon Web Services (AWS)

Seattle, WA

Software Development Engineer Intern – Amazon Linux Builder Experience

Summer 2025

- Designed and developed a **large-scale workflow visibility system** to monitor task completion timelines across Amazon.
- Built a **REST Coral API** with endpoints for task creation, updates, retrieval, and historical audit queries.
- Implemented **DynamoDB** storage with **AWS Lambda** handlers for versioned data modeling (latest + full history).
- **Optimized DynamoDB** access patterns to minimize read amplification and **reduce latency** under high request volume.
- Engineered a **real-time audit trail pipeline** using **DynamoDB Streams + Lambda**.
- **Automated tracking** of all task updates, **eliminating manual monitoring** of completion dates.
- Reduced reporting effort by **80%**, saving stakeholders **100+ hours/week**.
- Supported visibility for **500K+ tasks/year** across Amazon organizations.
- Designed queries with **100+ filterable attributes** to accelerate detection and accountability.
- Deployed and monitored services with **AWS CloudWatch** (metrics, logs, reliability).

Johnson & Johnson

Raritan, NJ

Software Asset Management Specialist Intern

Summer 2024

- Built a **Generative AI chatbot** in **Python** to query enterprise data catalogs using **ML**.
- Achieved **72K–128K hours saved per year**.
- Created global **Power BI** visualizations for software purchases to improve transparency, cost avoidance, risk assessment.
- Verified and accounted for **\$100M+** previously unreported in stakeholder reports.
- Identified **\$18,399** in cost avoidances for Software Manager Rejections / Idle Requests and authored documentation.
- Led the **TICC Development Team** to organize weekly professional intern events.
- Led End User Services Food Drive totaling **157 donations**.

Food For All

Somerset County, NJ

Founder and President

Mar 2020 – Present

- Founded a non-profit coordinating community donations to the Somerset County Food Bank.
- Organized drives totaling **4,500+ lbs** of food donations; ran promotions and campaigns.

PROJECTS

Capital One - Fraud Detection (Capstone) | *Python, Flask, AWS, DynamoDB, API Gateway, Lambda, S3, Twilio*

- Built a robust **end-to-end full-stack** fraud detection service detecting fraudulent behavior with **99.3%+ accuracy**.
- Developed and trained a **Random Forest** fraud detection model on **1M+ simulated credit card transactions**.
- Engineered a **cloud-based** backend on **AWS** with **Flask API** to process incoming transactions, facilitate new user configurations, run **real-time fraud scoring**, and support **scalable** detection of suspicious activity.
- Integrated **Twilio SMS alerts** to notify users when transactions exceeded configurable fraud thresholds.

Soundscape | *Kotlin, Jetpack Compose, Firebase, Google Maps*

- Built a multi-screen Android app that logs and visualizes **real-time campus noise levels from 5,000+ geo-tagged sound events per week**, enabling students to identify quiet and high-traffic areas.
- Engineered a **Google Maps heatmap** clustering sound events via spatial binning and distance-weighted averaging; computed nearest-hit distances and color-graded decibel levels for **rapid visual scanning**.
- Designed analytics workflows applying **EWMA smoothing** and time-bucket aggregation to detect **peak-hour noise trends**, improve signal stability by **35%**, and surface **top 10 quiet locations** with **sub-250ms query latency**.

SKILLS & EXTRACURRICULARS

Programming: Java, Python, JavaScript, C, Kotlin, HTML/CSS, SQL, React.js, React Native, R, Three.js

Tools: AWS DynamoDB, AWS Lambda, AWS SageMaker, AWS Coral, AWS CloudWatch, Excel, Power BI, Tableau

Certifications: PSM I Scrum Master

Clubs: Code 4 Good, Code to Connect, Computer Science Club, Data Science Club, Delta Chi Fraternity
